## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 12, 13, 15, 17, 18, 20, 24-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 12 and 26, “a second connection device ... between the incoming terminal contact and the outgoing terminal contact” is misdescriptive in that the second connection device is on a terminal contact rather than between terminal contacts. Claims 13, 15, 17-20, 24, and 25 inherit the defect in their parent claim.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 12, 17, 18, 25, and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Hurley, et al.

Hurley discloses an electrical switching device having a housing 12 with incoming and outgoing terminal contacts with first 16 and second 24 connection devices disposed (recessed) inside the housing.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hurley, cited above. Hurley did not disclose the receiving hole of the second connection device 24 having a contact tab section extending upward or downward at an edge portion thereof. It would have been obvious to one of ordinary skill in the art to retain a contact tab section extending upward or downward depending on the direction of punching as a remnant of the process of manufacture.

***Allowable Subject Matter***

7. Claims 27-29 are allowed.

***Response to Arguments***

8. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
